## **Helicopter Crash Litigation, Second Edition** Gary C. Robb

Helicopter Crash Litigation, Second Edition is, simply put, an essential volume for any lawyer litigating a helicopter crash case. No other book is devoted exclusively to the representation of plaintiffs in helicopter crash cases. These unique cases require a different approach and techniques, which you will learn from accomplished trial lawyer Gary Robb, who has used these same techniques in a brilliant career as a trial lawyer.

For thirty years, Robb has handled numerous helicopter crash lawsuits throughout the country. His long-standing success earned him the recognition by Forbes Magazine as "by far the most successful helicopter crash attorney in the country." His \$350 million jury verdict in 1995 on behalf of a pilot killed in a helicopter crash and his \$70 million jury verdict for a young woman killed in that same crash are the two highest jury verdicts in helicopter crash cases in U.S. history.

In this book, Robb leads you through the myriad complexities that inevitably arise from cases involving these unique flying machines. Helicopter crash litigation is difficult. From start to finish, these cases are as complex and challenging as any to be found in civil litigation. This book removes some of that mystery and offers practical and useful advice, giving you the tools to successfully litigate such cases. Utilizing this book, you will be able to maximize the prospects of success for persons injured in helicopter crashes and for the families of those who have had loved ones killed in those crashes.

This indispensable text travels through the different knowledge and skill sets critical in the successful handling of these cases, ranging from the basic elements of helicopter structure and flight, through the preliminary factual investigation, filing the case, discovery, common defenses, damages and trial. Real helicopter case examples are utilized throughout so as to give context to the suggestions and techniques discussed. The author also recommends safety improvements within the helicopter industry for preventing these accidents in the future.
