## Media Education Across Europe

Education in and about the media is expanding across Europe and, like the industries it studies, is changing rapidly. The future of media education is a matter of live concern in all European countries, as educators and practitioners throughout the continent come together to learn from each other and to plan for the changes to come.

*Media Education Across Europe* identifies the exciting developments now taking place within and across the boundaries of European nation-states. Essays from eight countries - the U.K., France, Germany, Italy, Spain, Belgium, Sweden and the Netherlands - explore the development of courses and approaches to the subject in each country. The contributors also consider the prospects for European collaboration in media education; the possibilities opening up for graduate employment and the future conflict - and co-operation - between media teachers and media employers.
