Examines popular and traditional forms of parliamentary accountability, and investigates the role of UK and European courts and inquiries in the system of legal and quasi-legal accountability. The book also explores the rise of charterism and consumerism and their effectiveness.

This is an examination of popular and traditional forms of parliamentary accountability. It investigates the role of UK and European courts and inquiries in the system of legal and quasi-legal accountability. With concepts such as the enabling, contracting and regulatory state coming to the fore, there are extensive implications for accountability and control within government. This text examines those implications and is aimed at students and lecturers involved in undergraduate and degree- level programmes covering government, politics, public policy, public administration and management. It also explores the rise of charterism and consumerism and their effectiveness, and analyzes key cases such as Westland and Matrix Churchill to illustrate the effectiveness of "realpolitik" and secrecy in thwarting official mechanisms of scrutiny and control.
