Interventional Nephrology Arif Asif, Anil K. Agarwal, Alexander Yevzlin, Steven Wu, Gerald A. Beathard

A complete guide to every aspect of interventional nephrology—an essential text for students, residents, fellows, and clinicians

This timely resource examines all relevant aspects of interventional nephrology, from the history of nephrology to the principles governing the latest vascular access techniques. Heavily illustrated with full-color procedural drawings and featuring an easy-to-follow design, the book includes contributions from many leading authorities in the field whose insights combine to form an unprecedented, clinically rigorous survey of interventional nephrology.

Interventional Nephrology opens with an instructive look at the origins of hemodialysis access; an overview of the history of interventional nephrology in the U.S. and abroad; and clinically relevant coverage of vascular access outcomes. The high-yield coverage continues with a probing assessment of ethics, public policy, and practice guidelines, illuminating such pivotal topics as industry partnerships and conflicts of interest. The principles that support interventional nephrology techniques are also extensively reviewed, encompassing everything from vascular mapping to peritoneal dialysis catheter removal, while the following section delves into the key surgical aspects of vascular access. Finally, the book provides useful perspectives on how political and policy affairs impact current practice.

FEATURES

- Illustrated with precise full-color drawings and radiographs that highlight both normal and vascular anatomy and clarify the management of vascular access problems
- Streamlined design and helpful pedagogy, including chapter-opening learning objectives, numerous tables, and concept-clarifying figures
- Complete overview of the core principles underlying interventional nephrology practice and techniques, covering vascular mapping, monitoring and surveillance of arteriovenous access, venous angioplasty, tunneled catheters, renal ultrasonography, and much more
- Discussion of vascular access in special populations and the role of pharmacologic agents in preserving vascular access provides evidence-based insights that are pertinent to the everyday practice of interventional nephrology
- In-depth emphasis on the surgical aspects of vascular access reviews sites, types, and creation of arteriovenous fistulae; secondary arteriovenous fistula; and surgical options for vascular anomalies
- Forward-thinking coverage of basic and translational science considers future directions in vascular access science; flow dynamics, maturity, and access failure; neointimal hyperplasia; pharmacologic prevention of access dysfunction; and device innovation

From reader reviews:

Keiko Whitchurch:

Information is provisions for those to get better life, information nowadays can get by anyone from everywhere. The information can be a understanding or any news even a concern. What people must be consider while those information which is inside former life are hard to be find than now is taking seriously which one is suitable to believe or which one the particular resource are convinced. If you find the unstable resource then you get it as your main information it will have huge disadvantage for you. All those possibilities will not happen within you if you take Interventional Nephrology as the daily resource information.

Ezra Talbott:

Hey guys, do you would like to finds a new book to learn? May be the book with the headline Interventional Nephrology suitable to you? The book was written by famous writer in this era. The book untitled Interventional Nephrology is one of several books in which everyone read now. That book was inspired a number of people in the world. When you read this reserve you will enter the new dimension that you ever know just before. The author explained their concept in the simple way, so all of people can easily to understand the core of this guide. This book will give you a wide range of information about this world now. To help you see the represented of the world on this book.

Dan Fry:

The book Interventional Nephrology has a lot info on it. So when you make sure to read this book you can get a lot of gain. The book was compiled by the very famous author. This articles author makes some research prior to write this book. This kind of book very easy to read you will get the point easily after looking over this book.

Carolyn Wilson:

As we know that book is very important thing to add our information for everything. By a e-book we can know everything you want. A book is a list of written, printed, illustrated or perhaps blank sheet. Every year has been exactly added. This e-book Interventional Nephrology was filled with regards to science. Spend your time to add your knowledge about your scientific disciplines competence. Some people has various feel when they reading some sort of book. If you know how big benefit of a book, you can experience enjoy to read a book. In the modern era like now, many ways to get book you wanted.
