**Frozen Section Library: Genitourinary Tract: 2** Luan D. Truong, Steven S. Shen, Jae Y. Ro

Frozen sections are performed for the purpose of rapid diagnosis while a patient is undergoing surgery, usually under general anesthesia, as a basis for making immediate treatment decisions. Therefore, frozen section diagnosis is often a highly demanding situation for the pathologist who must render a diagnosis quickly and a crucial determination for the patient and surgeon. In addition to the need for rapid recall of differential diagnoses, there are many pitfalls and artifacts that add to the risk of frozen section diagnosis that are not present with permanent sections of fully processed tissues that can be examined in a more leisurely fashion. Most standard pathology textbooks, both general and subspecialty, largely ignore the topic of frozen section. Few textbooks have ever focused exclusively on frozen section diagnosis and those textbooks that have done so are now out-of-date and have limited numbers of black and white figures. None has emphasized the education of the surgeon in terms of frozen section benefits, limitations or proper utilization. The Frozen Section Library series will provide convenient, user-friendly handbooks for each organ system to expedite use in the hurried frozen section situation. These books will be small and light-weight, copiously color illustrated with images of actual frozen sections, highlighting pitfalls, artifacts and differential diagnosis. These books will also include perspectives for the surgeon and for communication with the surgeon and suggest ancillary procedures (for example, when to take tissue for microbiology cultures). Each 5 X 8 book is estimated to be about 200 to 250 pages in toto with 100 to 150 color figures each. As a handbook for practicing pathologists, these books will be indispensable aids to diagnosis and avoiding dangers in one of the most challenging situations that pathologists encounter. Problems, such as differentiation of benign processes from malignant neoplasms which may be more difficult on frozen section than permanent section and which have a serious impact on the surgeon's immediate treatment decisions, will be emphasized. Rapid consideration of differential diagnoses and how to avoid traps caused by frozen section artifacts will be readily accessible to the users of the handbooks. A series of concise, easy-to-use, well-illustrated handbooks alleviates the often frustrating and time-consuming, sometimes futile, process of searching through bulky textbooks that are unlikely to illustrate or discuss pathologic diagnoses from the perspective of frozen sections in the first place. Tables and charts will provide guidance for differential diagnosis of various histologic patterns. The advantages of a series of organ-specific handbooks, in addition to the ease-of-use and manageable size, is that (1) it allows more comprehensive coverage of more diagnoses, both common and rare, than a single volume that tries to highlight a limited number of diagnoses for each organ and (2) it allows more detailed insight by permitting experienced authorities to emphasize the peculiarities of frozen section for each organ system. Although some differences in practice of frozen section exist between different institutions, such as differing policies regarding whether or not to perform frozen section on specific types of specimens, these differences are generally not significant and can be discussed (an organ-specific handbook by an expert in that organ system permits more opportunity for this type of discussion). Touch preparations, which are used for some organs such as central nervous system or thyroid more often than others, will be appropriately emphasized and illustrated according to the need for each specific organ. This series will be highly valuable to practicing surgical pathologists, both co

**From reader reviews:**

**Ruth Williams:**

Book is to be different for every single grade. Book for children until adult are different content. We all know that that book is very important usually. The book Frozen Section Library: Genitourinary Tract: 2 seemed to be making you to know about other understanding and of course you can take more information. It is rather advantages for you. The book Frozen Section Library: Genitourinary Tract: 2 is not only giving you more new information but also being your friend when you sense bored. You can spend your personal spend time to read your publication. Try to make relationship together with the book Frozen Section Library: Genitourinary Tract: 2. You never really feel lose out for everything should you read some books.

**Vanessa Palacios:**

Information is provisions for individuals to get better life, information currently can get by anyone with everywhere. The information can be a knowledge or any news even a problem. What people must be consider whenever those information which is within the former life are challenging to be find than now could be taking seriously which one would work to believe or which one typically the resource are convinced. If you get the unstable resource then you have it as your main information we will see huge disadvantage for you. All of those possibilities will not happen throughout you if you take Frozen Section Library: Genitourinary Tract: 2 as the daily resource information.

**Jack Morgan:**

Is it you who having spare time after that spend it whole day by simply watching television programs or just lying on the bed? Do you need something new? This Frozen Section Library: Genitourinary Tract: 2 can be the response, oh how comes? A fresh book you know. You are and so out of date, spending your free time by reading in this completely new era is common not a geek activity. So what these books have than the others?

**Nancy Williams:**

Reading a reserve make you to get more knowledge as a result. You can take knowledge and information coming from a book. Book is written or printed or outlined from each source this filled update of news. Within this modern era like today, many ways to get information are available for you actually. From media social similar to newspaper, magazines, science e-book, encyclopedia, reference book, story and comic. You can add your understanding by that book. Do you want to spend your spare time to spread out your book? Or just trying to find the Frozen Section Library: Genitourinary Tract: 2 when you desired it?
