Biometric Inverse Problems Svetlana N. Yanushkevich, Adrian Stoica, Vlad P. Shmerko, Denis V. Popel
Traditional methods of biometric analysis are unable to overcome the limitations of existing approaches, mainly due to the lack of standards for input data, privacy concerns involving use and storage of actual biometric data, and unacceptable accuracy. Exploring solutions to inverse problems in biometrics transcends such limits and allows rich analysis of biometric information and systems for improved performance and testing. Although some particular inverse problems appear in the literature, until now there has been no comprehensive reference for these problems.

Biometric Inverse Problems provides the first comprehensive treatment of biometric data synthesis and modeling. This groundbreaking reference comprises eight self-contained chapters that cover the principles of biometric inverse problems; basics of data structure design; new automatic synthetic signature, fingerprint, and iris design; synthetic faces and DNA; and new tools for biometrics based on Voronoi diagrams. Based on the authors' vast experience in the field, the book authoritatively examines new approaches and methodologies in both direct and inverse biometrics, providing invaluable analytical and benchmarking tools. The authors include case studies, examples, and implementation codes for practical illustration of the methods.

Loaded with approximately 200 figures, 60 problems, 50 MATLAB® code fragments, and 200 examples, Biometric Inverse Problems sets the standard for innovation and authority in biometric data synthesis, modeling, and analysis.

From reader reviews:

Pauline Mueller:

What do you ponder on book? It is just for students as they are still students or that for all people in the world, exactly what the best subject for that? Merely you can be answered for that question above. Every person has different personality and hobby for each and every other. Don't to be forced someone or something that they don't would like do that. You must know how great and important the book Biometric Inverse Problems. All type of book would you see on many sources. You can look for the internet methods or other social media.

Janna Lefevre:

Information is provisions for folks to get better life, information currently can get by anyone on everywhere. The information can be a knowledge or any news even an issue. What people must be consider while those information which is inside former life are difficult to be find than now's taking seriously which one would work to believe or which one often the resource are convinced. If you receive the unstable resource then you obtain it as your main information you will see huge disadvantage for you. All of those possibilities will not happen inside you if you take Biometric Inverse Problems as your daily resource information.

Joshua Yoshida:

Reading can called mind hangout, why? Because if you are reading a book mainly book entitled Biometric Inverse Problems your mind will drift away trough every dimension, wandering in each and every aspect that maybe unidentified for but surely can become your mind friends. Imaging every word written in a guide then become one type conclusion and explanation which maybe you never get just before. The Biometric Inverse Problems giving you another experience more than blown away your head but also giving you useful information for your better life in this era. So now let us explain to you the relaxing pattern here is your body and mind will be pleased when you are finished reading through it, like winning an activity. Do you want to try this extraordinary shelling out spare time activity?

James Pitts:

Is it an individual who having spare time after that spend it whole day simply by watching television programs or just lying down on the bed? Do you need something new? This Biometric Inverse Problems can be the response, oh how comes? It's a book you know. You are thus out of date, spending your time by reading in this completely new era is common not a nerd activity. So what these books have than the others?
