Muller's Diseases of the Lung: Radiologic and Pathologic Correlations Kyung Soo Lee, Tomás Franquet, Joungho Han, Takeshi Johkoh

This text presents a detailed overview of the principal radiologic and pathologic findings of the most common pulmonary diseases. Its primary radiologic emphasis is on the appearance of the diseases and abnormalities. The goal is to offer the radiologist a greater appreciation of the patterns and distribution of the histopathologic abnormalities as shown on the imaging studies, and the pulmonary pathologist better understanding of the radiologic findings. The text features radiologic-pathologic correlation throughout and a strong emphasis on high-resolution CT, which generally provides the best depiction of anatomic features. Reviewers praised the concise and succinct narrative style of the first edition.
