The Plant Life of China: Diversity and Distribution

Geoffrey P. Chapman, Yin-Zheng Wang

The Plant Life of China: Diversity and Distribution Geoffrey P. Chapman, Yin-Zheng Wang

An authoritative account of the fascinating plant life of China, written by two botanical experts. Chinese plant life is estimated to include up to 30000 species and extends from the Himalayan snow line across a diversity of habitats to the lush tropical south. Although for many years access to Chinese plants was limited, the present situation provides an opportunity for a new and authoritative assessment of botanical treasure-houses such as Yunnan and Sichuan. It will be of interest to those working in agriculture, alternative medicine, plant conservation, ecology, genetics, horticulture, molecular biology and taxonomy.
