Hydrology

Madan Mohan Saikia, Mimi Das Das

Hydrology Madan Mohan Saikia, Mimi Das Das

Primarily intended as a textbook for the undergraduate and postgraduate students of civil engineering, this book introduces the concepts of hydrology in a comprehensive manner. It covers all the aspects of hydrology in 15 chapters.

The book starts with the hydrologic cycle which is the central concept of hydrology. Then it moves on to basics of hydrometeorology, abstraction losses like infiltration, runoff in different forms, instantaneous unit hydrograph (IUH) and its mathematical concepts like convolution integral, synthetic unit hydrograph (SUH) and S-hydrograph. Finally, the text concludes with estimation of flood by empirical equations and different flood frequency analysis, and hydrology of basin management which deals with soil conservation, water shed management and control of soil erosion that are very important for agricultural engineering.

KEY FEATURES

- Presents several numerical methods of solving unsteady hydraulic routing and ground flow equations.
- Contains solved examples to reinforce the understanding of the theory.
- Includes references in each chapter.

From reader reviews:

Harold Sparkman:

Often the book Hydrology has a lot details on it. So when you read this book you can get a lot of profit. The book was compiled by the very famous author. The writer makes some research prior to write this book. This kind of book very easy to read you can get the point easily after perusing this book.

Judith Tate:

In this period globalization it is important to someone to obtain information. The information will make anyone to understand the condition of the world. The condition of the world makes the information quicker to share. You can find a lot of sources to get information example: internet, magazine, book, and soon. You can observe that now, a lot of publisher that will print many kinds of book. The particular book that recommended for your requirements is Hydrology this e-book consist a lot of the information with the condition of this world now. This specific book was represented just how can the world has grown up. The terminology styles that writer require to explain it is easy to understand. The actual writer made some study when he makes this book. This is why this book ideal all of you.

Kristopher Sutherland:

This Hydrology is completely new way for you who has attention to look for some information as it relief your hunger of knowledge. Getting deeper you onto it getting knowledge more you know otherwise you who still having little digest in reading this Hydrology can be the light food for yourself because the information inside this particular book is easy to get by simply anyone. These books acquire itself in the form which can be reachable by anyone, yes I mean in the e-book web form. People who think that in publication form make them feel sleepy even dizzy this e-book is the answer. So there is not any in reading a book especially this one. You can find actually looking for. It should be here for a person. So , don't miss it! Just read this e-book type for your better life as well as knowledge.

William Evans:

A number of people said that they feel weary when they reading a book. They are directly felt the item when they get a half elements of the book. You can choose the book Hydrology to make your reading is interesting. Your own personal skill of reading ability is developing when you similar to reading. Try to choose easy book to make you enjoy you just read it and mingle the impression about book and reading through especially. It is to be first opinion for you to like to wide open a book and read it. Beside that the reserve Hydrology can to be your brand new friend when you're sense alone and confuse using what must you're doing of this time.
