Pharmaceutical and Medical Applications of Near-Infrared Spectroscopy, Second Edition (Practical Spectroscopy) Emil W. Ciurczak, Benoit Igne

Since the completion of the first edition of this book, major developments have occurred in the pharmaceutical industry that have shaped the field of near-infrared (NIR) spectroscopy. A new initiative from the U.S. Food and Drug Administration (FDA) to modernize regulations of pharmaceutical manufacturing and drug quality has helped position NIR spectroscopy as an effective tool for pharmaceutical testing. **Pharmaceutical and Medical Applications of Near-Infrared Spectroscopy: Second Edition** reflects these developments and brings readers an up-to-date summary of how this technique is being applied to pharmaceutical manufacturing.

Topics include:

- The origins and principles of NIR spectroscopy, including early instrumentation, spectroscopic theory, and light-particle interaction
- The physics of each instrument type, the strengths and weaknesses of each, and the manufacturers that produce them
- The possible advantages of using NIR methods for monitoring or controlling blending, as well as practical concerns for mixing processes
- NIR spectroscopy as applied to traditional granulation, drug layering, and film coating of beads or granules
- Pharmaceutical assays, including qualitative analysis, quantitative analysis, determination of actives in tablets and capsules, and considerations for intact dosage form analysis
- Steps involved in the validation and acceptance of an NIR spectroscopy method, including quality assurance, qualification and verification of instruments, and the International Conference on Harmonization (ICH) guidelines
- Medical applications, including those related to blood glucose measurements, tissue and major organ analysis, fetal analysis, and cancer research

Providing comprehensive coverage of NIR spectroscopy, from theory, mathematics, application, and mechanics of NIR analysis, the book supplies ample references to facilitate further research into this burgeoning field.

From reader reviews:

Mark Logan:

You can spend your free time to read this book this publication. This Pharmaceutical and Medical Applications of Near-Infrared Spectroscopy, Second Edition (Practical Spectroscopy) is simple to develop you can read it in the area, in the beach, train and also soon. If you did not have got much space to bring the actual printed book, you can buy typically the e-book. It is make you easier to read it. You can save typically the book in your smart phone. Consequently there are a lot of benefits that you will get when one buys this book.

Mark Bottoms:

As we know that book is important thing to add our expertise for everything. By a guide we can know everything we want. A book is a group of written, printed, illustrated or perhaps blank sheet. Every year seemed to be exactly added. This e-book Pharmaceutical and Medical Applications of Near-Infrared Spectroscopy, Second Edition (Practical Spectroscopy) was filled in relation to science. Spend your extra time to add your knowledge about your research competence. Some people has distinct feel when they reading some sort of book. If you know how big benefit from a book, you can sense enjoy to read a reserve. In the modern era like at this point, many ways to get book you wanted.

Leonard Jones:

That reserve can make you to feel relax. This particular book Pharmaceutical and Medical Applications of Near-Infrared Spectroscopy, Second Edition (Practical Spectroscopy) was multi-colored and of course has pictures on the website. As we know that book Pharmaceutical and Medical Applications of Near-Infrared Spectroscopy, Second Edition (Practical Spectroscopy) has many kinds or category. Start from kids until young adults. For example Naruto or Investigator Conan you can read and feel that you are the character on there. So , not at all of book are generally make you bored, any it offers up you feel happy, fun and chill out. Try to choose the best book for you personally and try to like reading this.

Kimberly Foust:

What is your hobby? Have you heard that will question when you got students? We believe that that concern was given by teacher with their students. Many kinds of hobby, Every person has different hobby. And you also know that little person including reading or as reading become their hobby. You need to know that reading is very important in addition to book as to be the factor. Book is important thing to incorporate you knowledge, except your own personal teacher or lecturer. You discover good news or update concerning something by book. Many kinds of books that can you decide to try be your object. One of them are these claims Pharmaceutical and Medical Applications of Near-Infrared Spectroscopy, Second Edition (Practical Spectroscopy).
