Building the Mobile Internet (Networking Technology)

Mark Grayson, Kevin Shatzkamer, Klaas Wierenga

Building the Mobile Internet (Networking Technology) Mark Grayson, Kevin Shatzkamer, Klaas Wierenga

The complete guide to technologies and protocols for delivering seamless mobile Internet experiences

In *Building the Mobile Internet*, three leading mobility architects and implementers from Cisco present complete foundational knowledge about tomorrow's mobile Internet. The authors cover everything from market trends and user expectations to the latest technical approaches for making the Internet "mobile by design."

Writing for senior technology decision-makers and network design professionals, the authors explain the relatively static nature of the Internet's original protocols and design, discuss the concept of "mobility," and identify evolving mobility requirements. Next, they thoroughly explain each of today's most promising techniques for building mobility into the Internet, from data link layer to application layer. For each layer, the authors cover mechanisms, protocols, relevant Wi-Fi and cellular architectures, and key use cases.

Using this book's guidance, mobile network executives can define more effective strategies, network designers can construct more effective architectures, and network engineers can execute more successful migrations.

Mark Grayson, Cisco Distinguished Consulting Engineer, leads Cisco's mobile architecture strategy. He has 20+ years of wireless experience ranging from military and satellite systems to the evolution of traditional cellular architectures and the creation of new small cell solutions. He has been granted 50+ patents.

Kevin Shatzkamer, Cisco Distinguished Systems Architect, is responsible for long-term strategy and architectural evolution of Cisco mobile wireless networks. His experience ranges from 3G and LTE to security, video distribution, and QoS. He now works with both content providers and service providers to enhance the end-to-end digital media value chain for mobility.

Klaas Wierenga, Senior Consulting Engineer in Cisco's Office of the CTO, has 15+ years of experience implementing diverse mobility, security, and identity solutions for enterprises, municipalities, hospitals, and universities. He created the worldwide eduroam service for federated network access in academia.

- Understanding key mobility market trends: device proliferation, accelerating consumption, and radio-specific scalability problems
- Reviewing the challenges that mobility presents to conventional Internet architectures
- Understanding nomadicity, including authentication for users moving across networks and operators
- Identifying opportunities to address mobility at the data link layer
- Comparing and using network layer solutions to deliver seamless mobility and session continuity
- Integrating mobility functionality into the transport/session layer
- Adding mobility functionality to the application layer—including support for moving media sessions between devices
- Redesigning Internet architecture to enable long-term improvements to mobility

This book is part of *the Networking Technology Series* from Cisco Press®, which offers networking

professionals valuable information for constructing efficient networks, understanding new technologies, and building successful careers.

From reader reviews:

Agnes Higa:

Have you spare time for just a day? What do you do when you have much more or little spare time? That's why, you can choose the suitable activity intended for spend your time. Any person spent their own spare time to take a walk, shopping, or went to often the Mall. How about open as well as read a book allowed Building the Mobile Internet (Networking Technology)? Maybe it is for being best activity for you. You understand beside you can spend your time together with your favorite's book, you can more intelligent than before. Do you agree with their opinion or you have other opinion?

Fidel Auxier:

Reading a e-book tends to be new life style within this era globalization. With examining you can get a lot of information that could give you benefit in your life. Along with book everyone in this world can certainly share their idea. Guides can also inspire a lot of people. Many author can inspire their very own reader with their story or even their experience. Not only the storyplot that share in the textbooks. But also they write about the knowledge about something that you need illustration. How to get the good score toefl, or how to teach your kids, there are many kinds of book that you can get now. The authors these days always try to improve their talent in writing, they also doing some exploration before they write with their book. One of them is this Building the Mobile Internet (Networking Technology).

Edith Stewart:

Spent a free time for you to be fun activity to accomplish! A lot of people spent their leisure time with their family, or their friends. Usually they accomplishing activity like watching television, going to beach, or picnic from the park. They actually doing same every week. Do you feel it? Do you want to something different to fill your current free time/ holiday? Could possibly be reading a book may be option to fill your free time/ holiday. The first thing you will ask may be what kinds of publication that you should read. If you want to test look for book, may be the publication untitled Building the Mobile Internet (Networking Technology) can be excellent book to read. May be it is usually best activity to you.

Kathy Davis:

Building the Mobile Internet (Networking Technology) can be one of your nice books that are good idea. We all recommend that straight away because this publication has good vocabulary that may increase your knowledge in words, easy to understand, bit entertaining but delivering the information. The author giving his/her effort that will put every word into pleasure arrangement in writing Building the Mobile Internet (Networking Technology) although doesn't forget the main point, giving the reader the hottest and based confirm resource facts that maybe you can be among it. This great information can drawn you into fresh stage of crucial considering.
