Walther Model (Command) Robert Forczyk

This volume details the military career and accomplishments of Walther Model, the youngest Generalfeldmarschall in the Wehrmacht in World War II and Hitler's favourite commander. Model was a tough and tenacious commander, particularly when on the defensive, and his career rise was virtually unprecedented in German military history. Model really made his mark late in the war, when time was already running out for the Third Reich, but time and again he was rushed from one crumbling front to the next and succeeded in temporarily restoring the situation. Above all, Model deserves recognition as one of the great defensive commanders of modern military history.
