Pierre Grisvard Memorial Volume (Progress in Nonlinear Differential Equations and Their Applications)

Pierre Grisvard Memorial Volume (Progress in Nonlinear Differential Equations and Their Applications)

Pierre Grisvard, one of the most distinguished French mathematicians, died on April 22, 1994. A Conference was held in November 1994 out of which grew the invited articles contained in this volume. All of the papers are related to functional analysis applied to partial differential equations, which was Grisvard's specialty. Indeed his knowledge of this area was extremely broad. He began his career as one of the very first students of Jacques Louis Lions, and in 1965, he presented his "State Thesis" on interpolation spaces, using in particular, spectral theory for linear operators in Banach spaces. After 1970, he became a specialist in the study of optimal regularity for partial differential equations with boundary conditions. He studied singularities coming from coefficients, boundary conditions, and mainly non-smooth domains, and left a legacy of precise results which have been published in journals and books. Pierre Grisvard spent most of his career as a full professor at the University of Nice, where he started in 1967. For shorter or longer periods, he visited several foreign countries, and collaborated with some of the most famous mathematicians in his field. He was also an excellent organizer and directed a large number of Ph.D. students. Finally, this volume contains a bibliography of Grisvard's works as well as one paper which he wrote and which has not been published before.

From reader reviews:

Jackie Lafond:

In this 21st century, people become competitive in most way. By being competitive at this point, people have do something to make these people survives, being in the middle of often the crowded place and notice by means of surrounding. One thing that oftentimes many people have underestimated this for a while is reading. Yep, by reading a publication your ability to survive increase then having chance to remain than other is high. For yourself who want to start reading a book, we give you this kind of Pierre Grisvard Memorial Volume (Progress in Nonlinear Differential Equations and Their Applications) book as beginning and daily reading e-book. Why, because this book is usually more than just a book.

Melvin Wilhelm:

As people who live in typically the modest era should be revise about what going on or info even knowledge to make these people keep up with the era which is always change and advance. Some of you maybe can update themselves by studying books. It is a good choice in your case but the problems coming to anyone is you don't know what kind you should start with. This Pierre Grisvard Memorial Volume (Progress in Nonlinear Differential Equations and Their Applications) is our recommendation so you keep up with the world. Why, because book serves what you want and need in this era.

Clarence Delapaz:

Are you kind of active person, only have 10 or perhaps 15 minute in your morning to upgrading your mind ability or thinking skill possibly analytical thinking? Then you have problem with the book compared to can satisfy your short time to read it because all this time you only find guide that need more time to be go through. Pierre Grisvard Memorial Volume (Progress in Nonlinear Differential Equations and Their Applications) can be your answer mainly because it can be read by you actually who have those short spare time problems.

Belinda Ferguson:

You may spend your free time to learn this book this reserve. This Pierre Grisvard Memorial Volume (Progress in Nonlinear Differential Equations and Their Applications) is simple to develop you can read it in the park, in the beach, train and also soon. If you did not have much space to bring often the printed book, you can buy often the e-book. It is make you better to read it. You can save the book in your smart phone. Thus there are a lot of benefits that you will get when you buy this book.
